

PATIENTS' BILL OF RIGHTS

We the People assert and affirm that Medical Freedom is a fundamental human right. Each individual has the responsibility and authority to make personal health decisions in the best interest of their wellbeing free from coercion, threat, force, or loss of everyday freedoms. To protect and ensure these truths, we assert the following individual rights.

WE BELIEVE THAT:

1. Everyone has the right to make decisions over one's own health and that those decisions must be respected by health care professionals, businesses, and the government.
2. No one has the right to violate the rights, autonomy, or bodily integrity of anyone else against their will.
3. Everyone has the right to informed consent, including a full disclosure of the benefits, risks, and alternative treatment options prior to making their decision. Where there is health risk, there must be choice.
4. Everyone has the right to choose or refuse any medical treatment or procedure, and that medical treatment cannot be denied because of individual health decisions.
5. Everyone has a right to medical privacy and medical history must be protected and be kept confidential; the sharing of medical history and decisions is at the sole discretion of the individual.
6. No one should ever be coerced, compelled, threatened, or forced to make a health decision against their will or conscience.
7. The government, corporations, schools, and other organizations must never be in a position to mandate any medical treatment under threat of loss of job or everyday freedoms as protected by their God-given rights to life, liberty, and the pursuit of happiness.
8. Parents have the ultimate and final authority over all health & medical decisions for their children.
9. Religious, medical, and philosophical exemptions to medical treatments must be protected and honored.
10. No policy that creates segregation or discrimination based on individual health choices can stand.
11. The government's role is to protect these rights and not force compliance.
